tReports

A module of tevixAccuPAS that **generates custom reports** from which to monitor vital aspects of your business by useful metrics.

Understand the performance of your company quickly and easily.

Measure productivity with the User Activity Report

Show productivity levels and utilization of the tevixAccuPAS solution.

- Real-Time Visits
- Patient Identity Search
- Benefit Only Search

Our industry-knowledgeable client success team is here to help you enhance your workflow. To ensure that your process is running smoothly and efficiently, we provide the following reports:

Visit Status
Showing status of eligible patients, non-actives and what needs attention. Available monthly and/or quarterly basis.

Payer Performance
Breakdown of top payers and how many searches were complete showing our due diligence.

Medicare Benefit Identification (MBI)
Reveals overall claims corrected and identifies percentages of Medicare IDs retrieved by showing the breakdown of active/non-active coverage by utilizing our MBI Lookup Tool.

Bulk Processing Overview
A deep dive into your bulk result files along with recommendations on how to achieve a higher hit rate.
