

## Software Developer

We're looking for a Software Developer to produce scalable software solutions. You'll be part of a cross-functional team that's responsible for the full software development life cycle, from conception to deployment.

As a Software Developer, you should be comfortable around both front-end and back-end coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility. If you're also familiar with Agile methodologies, we'd like to meet you.

### Skills:

- Proven experience as a Software Developer or similar role at least for 3+ years.
- Knowledge of Node.js, Java, Angular, C#, JavaScript, XML, jQuery.
- Familiarity with databases (e.g. MySQL, MongoDB).
- Ability to understand business requirements and translate them into technical requirements.
- Familiarity with code versioning tools such as Git.
- Highly self-motivated, can-do attitude, detail-oriented, and organized.
- English - technical proficiency.
- Bachelor's degree or equivalent experience in a software engineering discipline.
