

# tPay

A module of tevixAccuPAS that quickly, easily and safely collect the patient portion of the bill at any point of the patient engagement process.

## Create billing transparency with tPay.

Includes a robust and full-featured patient payment interface, automated collections and an array of payment options that work for your patients.

### Collect patient portion now

Not 30, 60, 90 days later, if ever

### Quickly increases cash flow

Greatly reduces patient payment receivables

### All features are integrated into the same window

No moving back & forth

### Creates billing transparency for the patient

No surprise bill

### Reduces time & cost of billing efforts

Reduces errors, manual efforts & 3rd party collections efforts

## Features:

- A variety of convenient payment methods to offer the patient: cash, check, credit card
- 2-10 month automated, interest-free, no-credit-check payment plan that can be set up immediately and securely - that patients administer themselves
- Does not require a merchant account
- Custom and editable popup fee schedule
- On-board calculator that does all the math work for you
- Patient's financial responsibility displays automatically
- Patient's outstanding balances
- Ability to secure future payment (post-EOB patient responsibility)
- Prior-Authorization requirements
- Branded patient payment web-portal - so patients can manage their own payments/ payment plans with no work for you
